

Adding and Subtracting Integers HW

$$1) 1 - 5 =$$

$$2) 4 - (-2) =$$

$$3) -3 - 2 =$$

$$4) -5 + 8 =$$

$$5) -3 + (-3) =$$

$$6) 2 + (-9) =$$

$$7) 7 + (-10) =$$

$$8) -7 + 13 =$$

$$9) -3 + (-1) + (-2) =$$

- 10) A submarine is cruising at 40 m below sea level. The submarine ascends 18 m. What is the submarine's new location?

Challenge: During a possession in a football game, the Vikings gained 22 yards, lost 15 yards, gained 3 yards, gained 20 yards and lost 5 yards. At the end of the possession, how many yards had they lost or gained?
